PROFESSIONAL SUMMARY

Computer Science Engineering graduate with a strong foundation in Python, SQL, and machine learning, backed by hands-on project experience in data analysis and Android application development. Adept at translating analytical insights into practical, real-world software solutions. Currently strengthening industry-ready skills in data analytics and cybersecurity through structured professional training. Eager to contribute as an entry-level software developer or data analyst in a growth-oriented organization.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering Synergy Institute of Technology, BPUT Aggregate: 75.9%	2022 – 2026
Senior Secondary (Class XII), CBSE Apex Senior Secondary English Medium School Percentage: 72.4%	2020 – 2022
Matriculation (Class X), CBSE Apex English Medium School Percentage: 81%	2019 – 2020

INTERNSHIP EXPERIENCE

Python Data Analyst Trainee

- Undergoing industry-oriented training in Python, SQL, and data analytics as part of a structured professional development program.
- Building proficiency in SQL, Power BI/Tableau, data visualization, and foundational machine learning concepts.
- Executing hands-on projects covering data cleaning, preprocessing, and business reporting.

NOTABLE PROJECTS

Android-Based Coronary Heart Disease Prediction System

- Developed an Android healthcare application leveraging machine learning and Firebase for real-time functionality.
- Implemented the Random Forest algorithm to predict coronary heart disease risk from patient data.
- Integrated Firebase for real-time cloud storage and secure user data management.
- Technologies used: Android Studio, Java/Kotlin, Firebase, Python, Machine Learning.

Predicting Coronary Heart Disease Using Machine Learning Techniques

- Designed and implemented a machine learning-based system to assess coronary heart disease risk.
- Performed data preprocessing, cleaning, and feature selection to improve model reliability.
- Applied supervised learning algorithms to enhance prediction accuracy.
- Gained practical experience in Python programming, data analysis, and model evaluation.

ML-Based Quiz Application

- Developed a GUI-based quiz application using Tkinter and Logistic Regression.
- Designed a predictive model to assess and forecast user performance based on quiz scores.

TECHNICAL SKILLS

Programming Languages: C, Java, Python, SQL, HTML, CSS

Tools & Platforms: MySQL, Excel, PowerPoint, VS Code, Jupyter Notebook

Core Concepts: Machine Learning Fundamentals, Data Structures

Databases: MySQL

ACHIEVEMENTS & CERTIFICATIONS

- Python — Infosys Springboard (October 2023)
- Web Development Training — AcmeGrade (August 2025 – September 2025)
- Junior Cybersecurity Analyst Career Path — Cisco Networking Academy (February 2026)
- Cybersecurity Essentials — Cisco Networking Academy (February 2026)
